

CENOVUS ENERGY

SitecoreAI Brand Kit

Demo-ready brand guidance for SitecoreAI / Stream ingestion

This brand kit gives SitecoreAI enough structured brand knowledge to generate consistent Cenovus content across campaign, web, social, email, advertising, internal communications and investor-facing use cases. It is organized to align with common SitecoreAI Brand Kit sections: Global Goals, Brand Context, Tone of Voice, Dos and Don'ts, Grammar Guidelines, Visual Guidelines, Image Style, Checklist, and Glossary/Localization.

1. Global Goals

Field	Brand Kit Content
Purpose	Energize the world to make people's lives better by safely and responsibly producing, refining and delivering reliable energy.
Mission	Develop Cenovus assets safely, responsibly and cost-efficiently while creating long-term value for shareholders, employees, communities, Indigenous partners, customers and society.
Vision	Be a sustainable, low-cost, diversified and integrated energy leader known for operational excellence, financial discipline, responsible resource development and constructive leadership in the energy transition.
Brand promise	Reliable energy, responsibly developed - delivered with safety, discipline, transparency and care for people, communities and the environment.
Core values	Protect what matters. Do it right. Make it better. Do it together.
Strategic objectives	Top-tier safety performance and sustainability leadership; cost leadership; financial discipline; returns-focused capital allocation; value generation through integration.
Business ambition	Maximize value across the full energy value chain - from upstream production to upgrading, refining, transportation, wholesale, commercial and retail markets - while strengthening resilience through commodity cycles.

2. Brand Context

Company overview

Cenovus Energy is a Canadian-based integrated energy company headquartered in Calgary. The company operates across the oil and natural gas value chain, including exploration, production, upgrading, refining, transportation, marketing and retail. Its operations span Canada, the United States and the Asia Pacific region, with upstream assets in oil sands, heavy oil, conventional oil and natural gas, offshore production, and downstream operations in upgrading and refining.

Positioning statement

Cenovus is a disciplined, integrated energy leader that helps meet global demand for secure, affordable and responsibly produced energy while building long-term value through safety, operational excellence, sustainability leadership and smart capital allocation.

Audience priorities

Audience	What they care about	Messaging emphasis
Investors and analysts	Capital discipline, free funds flow, balance sheet resilience, shareholder returns, operational performance.	Lead with disciplined value creation, cost leadership, integration benefits, resilience and transparent performance.
Employees and candidates	Safety, belonging, growth, meaningful work, recognition and empowerment.	Show a people-first culture: protect what matters, make it better, do it together.
Communities and Indigenous partners	Safety, environmental stewardship, local benefits, trust, respect, long-term relationships.	Use humble, partnership-oriented language that emphasizes listening, shared value and meaningful action.
Customers and commercial partners	Reliable supply, product quality, operational dependability and practical solutions.	Highlight integrated capabilities, reliability, scale and responsible operations.
Policy and public stakeholders	Energy security, affordability, responsible production, transparency and constructive participation.	Be factual, balanced and constructive; connect Canadian energy to global security and economic strength.
Media and general public	Credibility, clarity, safety, environmental and social responsibility.	Use plain language, concrete examples and a calm, confident tone.

Key message pillars

- Safety first: Safety is the top value and the starting point for every operational, business and community decision.
- Integrated energy leadership: Cenovus creates value across upstream and downstream operations, from production through refining and marketing.
- Responsible resource development: Energy should be developed safely, responsibly, transparently and cost-effectively.
- Financial discipline: Cenovus emphasizes cost leadership, disciplined capital allocation, targeted debt levels and resilience through cycles.
- Constructive energy transition voice: Cenovus supports practical, technology-enabled progress that balances climate action, affordability, reliability and economic strength.
- Partnership and shared value: Cenovus builds respectful, long-term relationships with Indigenous communities, local communities, employees, partners and suppliers.
- Continuous improvement: Cenovus looks for better ways to operate, innovate, reduce risk and improve outcomes.

3. Tone of Voice

Field	Brand Kit Content
Primary personality	Responsible, pragmatic, confident, transparent, constructive and human.
Tone spectrum	Professional but not cold; optimistic but not promotional; factual but not defensive; direct but not blunt; human but not casual.
Voice attributes	Disciplined, safety-minded, practical, resilient, collaborative, trustworthy, respectful, clear and grounded.
Emotional impression	Readers should feel Cenovus is dependable, competent, accountable and committed to doing complex work responsibly.
Recommended cadence	Use concise sentences, active voice and plain language. Lead with the outcome, then provide proof or context.
Avoid	Hype, greenwashing, vague claims, defensiveness, overly technical jargon, political framing, exaggeration, fear-based language, and unsupported superlatives.

Tone examples

Use case	Preferred tone	Example
Operational update	Clear, calm, accountable	Our teams are focused on safe, reliable operations while completing planned maintenance with disciplined execution.
Sustainability message	Practical, evidence-based, balanced	We are advancing practical solutions that support reliable energy, environmental progress and long-term economic value.
Community message	Respectful, partnership-oriented	We listen first, build trust over time and work with communities to create shared value.
Investor message	Disciplined, performance-oriented	Our integrated portfolio is designed to generate resilient value through cost leadership, capital discipline and operational excellence.
Recruiting message	Human, empowering	At Cenovus, people do meaningful work in a culture where safety, belonging and performance matter.

4. Dos and Don'ts

Do	Why	Don't
Lead with safety, responsibility and reliability.	These are central to the company's identity and credibility.	Do not lead with growth at any cost.

Use specific proof points, operational examples and plain-English explanations.	Cenovus communicates best when grounded in facts.	Do not make broad claims without context or evidence.
Balance energy security, affordability, environmental progress and economic value.	The brand position is pragmatic and constructive.	Do not frame the energy transition as a binary choice.
Use respectful, long-term partnership language for Indigenous and community content.	Trust, listening and shared benefit are central themes.	Do not use transactional or paternalistic language.
Describe sustainability in measured, defensible terms.	Environmental claims must feel credible and precise.	Do not overstate environmental performance or imply instant transformation.
Keep headlines direct and benefit-oriented.	Cenovus should sound confident and clear.	Do not use cleverness that obscures meaning.
Use "Cenovus" after first full brand reference.	Keeps copy concise and readable.	Do not shorten to slang, initials or informal nicknames.
Write for a broad business audience unless the channel is technical.	The brand should be accessible.	Do not default to industry jargon.

5. Grammar Guidelines

- Use Canadian English by default for corporate, Canadian and global communications. Use U.S. English for U.S.-specific downstream, refining or retail communications when appropriate.
- Use active voice: "Cenovus operates," "Our teams are advancing," "We are focused."
- Use sentence case for headings and subheadings unless a specific campaign requires title case.
- Use "Cenovus Energy Inc." on first legal or investor reference; use "Cenovus" thereafter.
- Use "Indigenous," "First Nations" and "Metis" accurately and respectfully. Use community-specific names when known.
- Use "oil sands," "natural gas," "upstream," "downstream," "refining," "upgrading," and "SAGD" consistently.
- Spell out technical acronyms on first use: steam-assisted gravity drainage (SAGD), greenhouse gas (GHG), carbon capture and storage (CCS).
- Use numerals for measurements, percentages, dollar values and operational metrics. Provide units clearly: bbls/d, GJ, MW, tonnes, CO₂e.
- Use "responsible," "reliable," "safe," "disciplined," "integrated," "cost-efficient," "constructive," and "practical" as preferred vocabulary.
- Avoid unsupported absolutes such as "cleanest," "greenest," "best," "guaranteed," "zero impact," or "carbon-free" unless backed by approved source language.

6. Visual Guidelines

Logo usage

- Use the official Cenovus Energy logo exactly as supplied. Maintain legibility and clear space.
- Minimum logo size: 1 inch wide for applications where the full logo must remain legible.
- Use the white logo over a solid background in Cenovus brand colours.
- Use black or white logo versions over photography only when contrast is strong and the background is not busy.
- Do not stretch, squish, tilt, outline, recolour, grey out, rearrange, surround with type, drop "Energy," or alter the relationship between logo elements.

Colour palette

Colour	HEX / RGB	Recommended use
Slate Blue	#365860 / RGB 54, 88, 96	Primary corporate colour; headers, navigational elements, text accents, serious corporate communications.
Sienna	#C5683B / RGB 197, 104, 59	Warm accent; calls to action, human/community moments, highlights and campaign energy.

Green	#8A9A36 / RGB 138, 154, 54	Sustainability, land, safety, operational environment, progress and responsibility cues.
Blue	#6E9EAF / RGB 110, 158, 175	Technology, water, innovation, energy systems, calm supporting backgrounds.
Clay	#765948 / RGB 118, 89, 72	Earth, operations, materiality, secondary accents, grounded industrial context.
Neutral whites and warm greys	Use sparingly and cleanly	Whitespace, body backgrounds, charts and information hierarchy.

Typography and layout

- Use a clean, modern sans serif system such as Arial, Helvetica, Aptos or Open Sans for demo assets.
- Headlines should be clear, confident and benefit-led. Avoid overly decorative type.
- Use spacious layouts, strong alignment, ample whitespace and restrained colour blocking.
- Prioritize practical information hierarchy: headline, supporting proof, action or next step.
- Charts and data visuals should be simple, labelled clearly and designed for credibility over decoration.

7. Image Style

Field	Brand Kit Content
Overall style	Authentic, high-quality, natural, modern and grounded in real operations, people, communities and energy infrastructure.
Preferred subjects	Employees working safely; field operations; refineries and upgrading facilities; oil sands operations; control rooms; collaborative teams; Indigenous and community partnerships; technology and innovation; landscapes near operating areas.
Composition	Wide environmental compositions for scale; human-centered mid-shots for culture; clean detail shots for technology, safety and materials; strong horizontal lines and natural depth.
Lighting	Natural, clean, optimistic light. Sunrise/sunset industrial imagery can be used sparingly for warmth and scale. Avoid dark, ominous or overly dramatic treatment.
Colour feel	Use the Cenovus palette as an undertone: slate blue, sienna, green, blue and clay. Imagery should feel real, warm and balanced.
People imagery	Show capable, diverse, safety-conscious employees and partners. PPE should be accurate for the setting. Avoid staged smiles or generic stock-photo energy.
Avoid	Dirty, unsafe or chaotic industrial scenes; anonymous silhouettes; cliché greenwashing imagery; overly futuristic energy visuals; busy backgrounds behind logos; manipulative disaster imagery.
AI image guidance	Generated images should look photorealistic, regionally plausible and operationally safe. Include correct PPE, real industrial scale and credible Canadian/energy-sector context.

8. Content Checklist

- Does the content reflect safety as the top value?
- Does it connect energy to practical human, economic or societal value?
- Does it sound factual, constructive and measured?
- Does it avoid unsupported environmental or performance claims?
- Does it use clear, plain language for non-specialist audiences?
- Does it support the idea of Cenovus as a low-cost, diversified and integrated energy leader?
- Does it respect Indigenous and community relationships with careful, partnership-oriented language?
- Does it preserve credibility by balancing ambition with evidence?
- Does it follow logo, colour, typography and image-style guidance?
- Does the CTA give readers a practical next step without sounding salesy?

9. Glossary and Localization

Term	Usage guidance	Localization guidance
Cenovus Energy Inc.	Use for first legal, investor or formal reference.	Do not translate company name.
Cenovus	Use after first reference in most content.	Do not translate.
Protect what matters	Core value; use in culture, safety and responsibility contexts.	Translate conceptually where needed; preserve meaning over literalness.
Do it right	Core value; use for accountability, integrity and transparency.	Translate conceptually.
Make it better	Core value; use for performance, improvement and innovation.	Translate conceptually.
Do it together	Core value; use for teamwork, inclusion, trust and empowerment.	Translate conceptually.
Oil sands	Preferred term.	Use locally accepted energy-sector term; avoid politicized substitutions.
SAGD	Spell out on first use: steam-assisted gravity drainage.	Keep acronym after first definition.
Upstream	Exploration and production activities.	Translate where customary for energy-sector audiences.
Downstream	Upgrading, refining, marketing and distribution activities.	Translate where customary for energy-sector audiences.
Indigenous	Capitalize; use respectfully and accurately.	Use regionally appropriate term and avoid generic substitutions.
First Nations	Use when specifically referring to First Nations communities.	Do not generalize as all Indigenous peoples.
Metis	Use when specifically referring to Metis peoples.	Preserve accent if required by local style; maintain respectful usage.
GHG	Spell out greenhouse gas on first use.	Keep acronym after first definition if audience understands.
CCS	Spell out carbon capture and storage on first use.	Keep acronym after first definition.
bbls/d	Barrels per day; use in operational metrics.	Keep unit consistent or convert only where required.

10. Channel Guidance

Channel	Content approach	CTA style
Corporate web	Clear overview, practical proof, accessible energy-sector education.	Learn more, Explore our operations, Read our story.
Investor relations	Performance, discipline, capital allocation, resilience and governance.	View results, Download report, Listen to webcast.
Careers	Belonging, safety, professional growth, performance and meaningful work.	Explore careers, Join our team, See opportunities.
Community/social investment	Shared value, listening, respectful partnerships, long-term outcomes.	Apply for funding, Learn about our commitments, Read community stories.
Sustainability	Measured progress, governance, safety culture, social commitments and practical innovation.	Read the CSR report, Explore commitments, Learn about initiatives.
Social media	Human stories, operational pride, community impact and concise education.	Read more, Meet our people, See how it works.
Crisis/incident communications	Safety-first, factual, calm, timely and accountable.	Get updates, Contact media relations, Follow safety guidance.
